

PSHB Quarantine Area

Polyphagous shot-hole borer (PSHB) Quarantine Area

A Quarantine Area (QA) covering the entire Perth metropolitan area is in place to slow the spread of PSHB.

The QA is split into two zones:

Management Zone and **Containment Zone**.

Restrictions on the movement of wood, green waste, mulch, live plants and plant material apply.

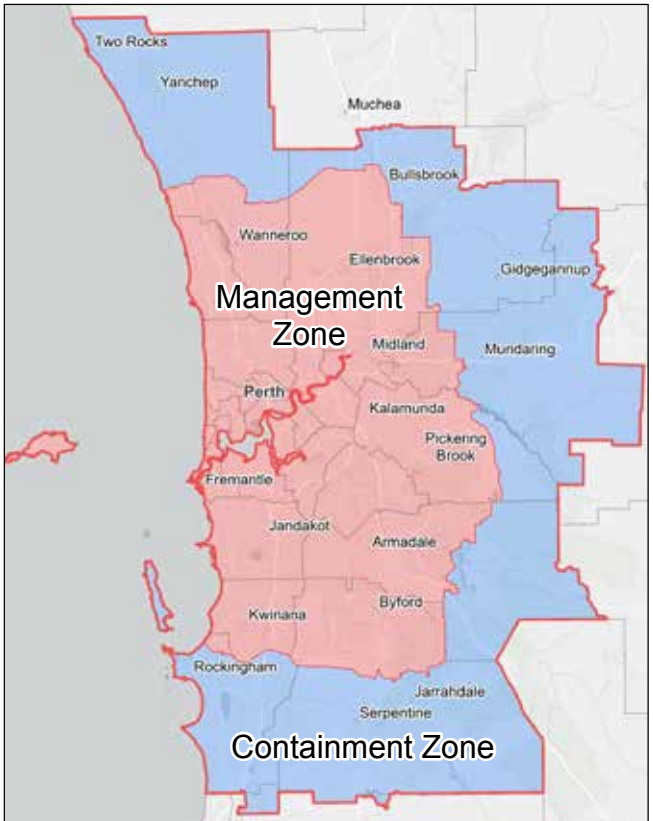

Wood must be chipped to pieces 2.5 cm or smaller before being moved outside the Management Zone or the QA.

Live plants with woody stems greater than 2 cm must not be moved outside of the Management Zone or the QA.

For more information and to view an interactive map of the QA, visit dpird.wa.gov.au/pshb
